# PIETRA Art LIMESTONE

30,000,000 years ago mineral rich springs flowed into shallow seas, mixing with shells and forming fossil rich limestone. Florida Tile is proud to introduce the latest addition to our PietraArt series - PietraArt Limestone. This natural quarried stone is available in four colors, and four sizes, 4"x4", 12"x12", 18"x18" and 24"x24"\*. Carved and honed chair rails and liners plus a variety of mesh mounted mosaic pieces make this Florida Tile's most expansive stone offering to date.

**DISCLAIMER**

Due to its porosity, limestone is prone to staining, therefore a proper sealing program is mandatory. A sealer such as Aquamix Sealer's Choice 15 Gold should be used prior to grouting. Since Limestone is formed in nature, color variations and small cracks are inevitable but do not detract from performance and only enhance limestone's natural beauty. Do not use acid based cleaners. Contact with metal in a damp environment can lead to rust spots. Please inspect all stones prior to installation, no claims will be considered after stones are installed. For sealing and installation recommendations, visit [www.floridatile.com](http://www.floridatile.com)

**And for Ocean Life only:**

Due to the high porosity and white coloration in Ocean Life, more stringent and frequent sealing is mandatory to maintain its beauty and to resist stains. Additionally, setting materials must be of a similar color. Do not install in very high traffic areas.

**TYPICAL USES**

PIETRAART LIMESTONE is appropriate for all residential and commercial floor, wall, countertop and backsplash applications. Ocean Life is not rated for commercial floor applications due to its high porosity.

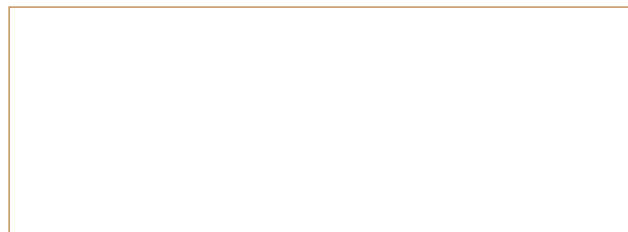

**SIZE AND TRIM INFORMATION<sup>1</sup>**

Nominal Size	Pcs./Sq.Ft.	Metric (cm)
4" x 4"	9.29	10 x 10
12" x 12"	1.0	30 x 30
18" x 18"	.44	45 x 45
24" x 24" (Special Order)	.25	60 x 60

<sup>1</sup>Chair rail and rounded molding available.

**COLOR VARIATIONS**

Color reproductions in this printed piece may vary from actual tile colors. Final selection should be made from actual tile samples.
